QUICK INSTALL GUIDE
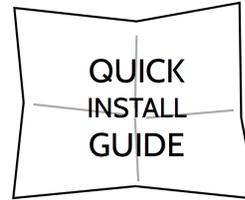

ABOUT THIS GUIDE

This document outlines the basic hardware specifications and software directions to install and customize the IQ Panel 2. Note that the information presented is not comprehensive, but is specifically dedicated to those menus, features, and systems accessible solely to those with the proper installation code. Features accessible to users and installers alike are outlined in the IQ Panel 2 User Guide. The information contained is confidential and proprietary, and is solely owned by Qolsys Inc. Any reproduction, modification or distribution without permission is strictly prohibited.

PANEL OVERVIEW

Warning: This Product should be installed in accordance with the National Fire Alarm Code, ANSI/NFPA 72, (National Fire Protection Association, Batterymarch Park,Quincy, MA 02269). Printed information describing proper installation, operation, testing, maintenance, evacuation planning, and repair service is to be provided with this Product. In Canada the product shall be installed in accordance with the Standard for the Installation of Residential Fire Warning Systems, CAN/ULC-S540.

Warning: For Canadian installations this Product and all sensors associated with it (collectively, the "System") should be tested once a week. The test shall be performed also with primary DC power de-energized. For recommended smoke detectors maintenance instructions refer to user manual associated with compatible Qolsys model QS5110-P840 smoke detector.

INSTALLING THE PANEL

WALL MOUNT OPTION
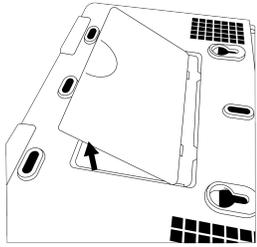

Insert your thumb or finger under the opening on the back cover and firmly pull up to remove. This cover is not needed for wall mount.

Press tabs on the bottom of the panel and pull apart to remove the back plate.

Mount to the wall using appropriate hardware ensuring it's level.
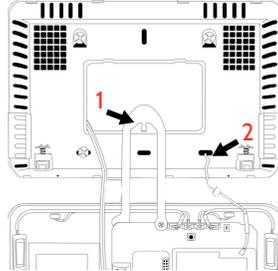

1. Hang the front of the panel with the hanging strap on the back plate as shown above.

2. Make a small hole in the wall through the bottom right mounting hole and feed the white RF antenna into the wall.

*IMPORTANT: **Not properly routing the RF antenna in the wall will greatly reduce RF sensor range.***
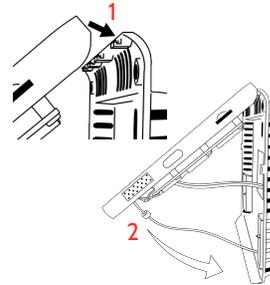

Connect your 5.0 - 5.5v DC Power supply to the barrel jack or to the (+/Red) and (-/Black) terminals if using a custom length wire.

1. At a 60° - 90° angle seat the top of the panel on the top 4 tabs of the back plate. Ensure the tabs line up with the grooves on the panel.

2. Swing the panel downwards to close while feeding the antenna and power wire in the wall.
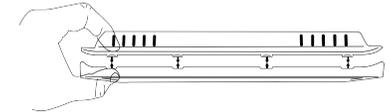

If there is a gap on the top because the panel did not completely close, firmly pinch at all 4 snap tab locations to ensure proper closure. You will hear a "pop" or "snap" sound when pinched.

TABLE STAND OPTION
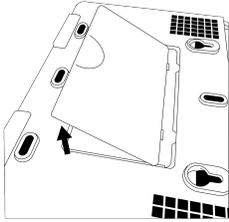

Insert your thumb or finger under the opening on the back cover and firmly pull up to remove.
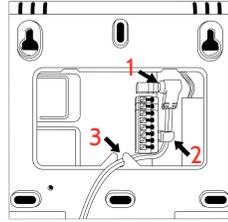

1. With the included power supply and cable, plug the barrel connector into the jack next to the terminals as shown above.

2. Route the cable under the hook next to the battery.

3. Route the cable through the strain relief opening.
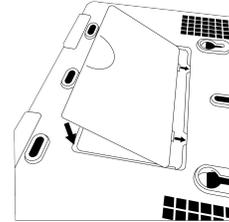

Replace the cover by inserting the top first, then while making sure the cable passes under the opening firmly press down on the bottom until the cover "snaps" into place.
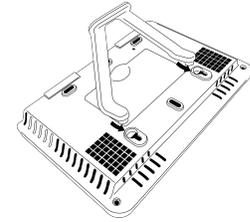

Insert table stand dowels into the 2 upper keyholes.

Slide the stand firmly upwards until you hear a "click" from each side.

NOTES

IMPORTANT IF USING CUSTOM LENGTH WIRE: Use 18AWG wire no longer than 25ft to ensure sufficient power is received at the panel.

NOTE: Inputs are used only for Burglary applications.

NOTE: Use only UL/ cUL listed external siren in UL/cUL listed installations. Rating:12vDC/ 300mA

POWERING THE PANEL
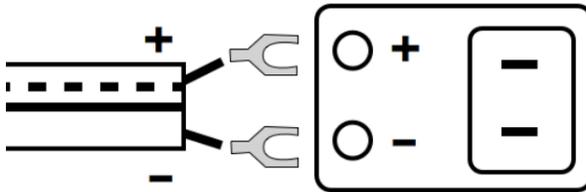

Connect power supply.
WARNING! Use 5.0 – 5.5v Power Supply ONLY

If using the provided cable, the "striped" wire is (+)

IMPORTANT IF USING CUSTOM LENGTH WIRE:
Use 18AWG wire no longer than 25ft to ensure
sufficient power is received at the panel.

Press and hold the power button on
the right side of the panel for 3
seconds to power up.

USER INTERFACE

HOME SCREEN OVERVIEW

The home screen is divided into three sections. The header shows the date & time, today's weather, message center and the Settings tray. The Primary interface shows arming options and sensor status. The footer shows panic options and additional pages.

SETTINGS TRAY

FIND IT

To access the Settings tray swipe down on the bar at the top of the screen. The Settings tray has quick access to system, battery, wi-fi, bluetooth & cellular status as well as volume control, brightness and other quick settings.
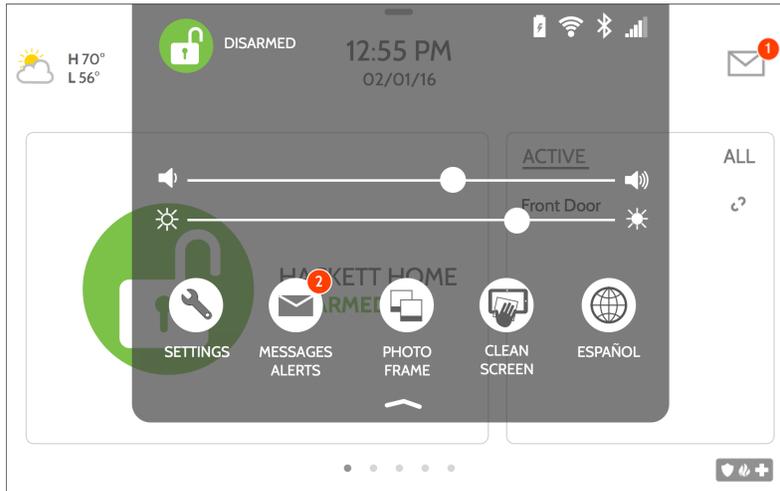

Swipe down for access

PROGRAMMING

SETTINGS

FIND IT
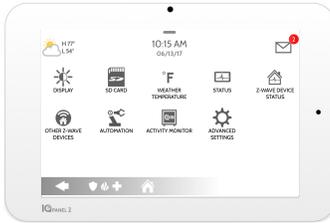

The Settings page allows quick access to various simple features & settings that do not require the protection of a Dealer, Installer or Master code to be changed.

Swipe down for access
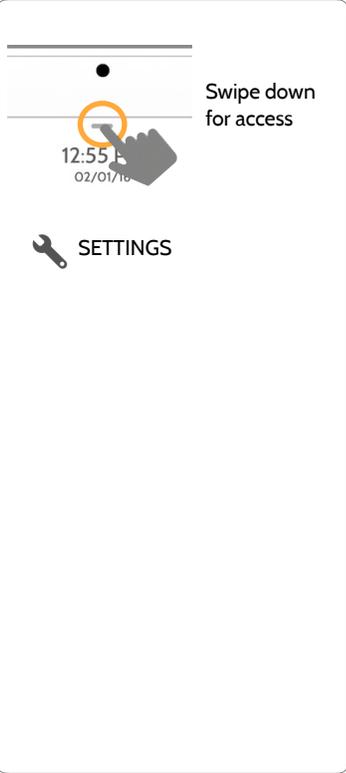

SETTINGS

Setting	Description
Display	Adjust brightness, font size & 12/24 hour time
SD Card	Mount, unmount and manage SD Cards that are installed in a panel
Weather Temperature	Toggle between Farenheight and Celcius
Status	View the "Current Status" of security sensors: Zone #, Name, Status (Open, Close, Active, Idle, Tamper, Failure), Battery and sensor History. Also view "Alarms" and "History" for security sensors globally
Z-Wave Device Status	View the "Current Status" of Z-Wave devices: Name, Type, Status (Normal, Failure), and Battery. Also view "Alerts" and "History" for Z-Wave globally
Other Z-Wave Devices	Shows Z-Wave devices that are learned into the panel but that are not part of the main user interface (Lights, Locks, Thermostats & Garage Doors)

SETTINGS

FIND IT

Setting	Description
Automation	Add, Edit or mange local lighting automation rules. These rules are separate from any cloud based rules that may be set through Alarm.com. Examples of possible rules are as follows: - **Night**: Turns light on at 7pm and off at 6am - **Evening**: Turns light on at 7pm and off at 11pm - **Front Door**: Turns light on for 15mins when Front Door opens between 5pm and 7am (must have a sensor with the default quick name "Front Door" added in the panel) - **Doorbell**: Turns light on between 5pm and 7am for 15 mins when Doorbell is activated (must have a sensor with the default quick name "Doorbell" added in the panel)
Activity Monitor	Activity Monitor allows access to disarm sensors that are programmed as 24 hours zones, such as Sensor Groups 8, 9 & 25. A valid Master, User or Guest code is required to control 24 hour activity sensors. 2 options are provided: - **Quick Access**: 300 second temporary access - **Deactivate**: Disarms 24 hour sensors until they are re-activated manually
Advanced Settings	Access advanced settings & programming. A valid Dealer (default 2222), Installer (default 1111) or Master Code (default 1234) is required

INSTALLER/DEALER SETTINGS
* Additional options available only through the Dealer Code.

INSTALLER/DEALER SETTINGS

Setting	Default	Description
Loss of Cell Signal Timeout	30	Select the length in minutes (10-120) before reporting a loss in cellular signal
Communication Test	Monthly	Choose Never, Weekly or Monthly when enabling the automated communication test
SIA Limits Note: for UL/cUL set entry delay to 45 sec. and for UL set exit delay to max 120 sec. and for cUL set exit delay to 60 sec.	Enabled	When **enabled**, the range for entry and exit delays is as follows: -Entry delay: 30-240 seconds, Exit Delay: 45-254 seconds When **disabled**, the range for entry and exit delays are as follows: -Entry delay: 5 to 240 seconds, Exit delay: 5 to 254 seconds When **enabled** the range for Dialer Delay is: 15 to 45 seconds When **disabled** the range for Dialer Delay is: 0 to 254 seconds
Languages	English	Set the panel's primary language to English(USA), French(Canada), Spanish(Latin America)
Favorite Languages	English/Spanish	Set the Panel's language toggle to your favorite 2 languages using French, English or Spanish
Hardware Power Button	Enabled	Turning this setting off completely disables the "Power Button" on the right side of the panel and all of it's functions. To re-enable this setting you must first check the box then follow the on screen prompts to press the "Toggle" switch in the back of the panel
Jam Detection*	Disabled	When enabled the system can detect when an unusual amount of RF signals are being transmitted leading to a potential panel malfunction. This event reports to the central station when enabled

INSTALLER/DEALER SETTINGS

Setting	Default	Description
Jam Detection Local Alarm* Note: Not evaluated by UL/cUL	Disabled	When enabled the system will sound a local alarm. "Jam Detection" must be active for this to function properly
RF Jam Sensitvity Level*	Normal	Choose between HIGH and NORMAL sensitivity levels
Allow Master Code to Access Security Sensors	Disabled	Allow the Master Code to access to the Security Sensor icon, including Auto Learn Sensor, Add Sensor, Edit Sensor, Delete Sensor, Sensor Status & Sensor Group
Open/Close Reports Allowed For Auto Learn	Enabled	Rather than sending a tamper to auto learn a sensor, enabling this will allow an open/close of the sensor to trigger auto learn
Panel Glass Break Detector	Disabled	Creates an independent zone that leverages the panel's built-in microphones to act as a glass break detector. This will fall into the zone order at the time you enable this feature
Panel Motion Detector	Disabled	Creates an independent zone that leverages the panel's built-in camera to act as an activity motion detector. This will fall into the zone order at the time you enable this feature. Motion can trip once every 4 minutes. *Please note: The panel motion detector is for activity monitoring and automation only (Group 25) and will not create an alarm condition or act as a security PIR.*
WI-FI Warning Messages	Enabled	When enabled the panel will display a pop up when entering "Settings" letting the end user know that Wi-Fi has been disconnected.

INSTALLER/DEALER SETTINGS

Setting	Description
Delete All Sensors	Deletes all security sensors and Bluetooth devices programmed in the panel
Delete All Z-Wave Devices	Deletes all Z-Wave devices programmed in the panel. This does not clear the device
Master Reset*	Restores panel to factory settings and erases all content
Data Recycle	This feature erases all User data previously stored
Reset Panel With Last Back-up Image*	Restores the panel to factory settings using the last known good software image

SYSTEM LOGS

FIND IT

System logs allow the panel to send non-customer identifying information to the server for troubleshooting and bug identification.

Setting	Default	Description
Upload logs to the server	*Requires manual push*	Tell the panel to begin uploading a history of it's activity to the server. This information is used to troubleshoot bugs and diagnose panel problems. The panel will upload any logs saved in it's memory
Auto Upload Logs	Disabled	Automatically upload the system's log to the servers every 24 hours
Log Level	Debug	Tell the panel how much information to record in log files. **No log output:** No information recorded **Fatal**: Record fatal or severely problematic information only **Error**: Record all errors and fatal issues **Warn**: Record warnings, errors, and fatal issues **Info**: Record all generic, non-customer related information **Debug**: Record diagnostic messages, Info, Warnings, Errors, and Fatal issues **Verbose**: Record all non-customer identifying information

DOOR/WINDOW

GROUP	NAME	SUPERVISED	SCENARIO
10	Entry-Exit- Normal Delay	Y	Gives a period of time to exit the home or to disarm the panel when returning before sounding the alarm
12	Entry-Exit- Long Delay	Y	Gives a period of time to exit the home or to disarm the panel when returning before sounding the alarm. This can be a separate delay from the "normal delay"
13	Instant Perimeter D/W	Y	Door or window that triggers an alarm **instantly** when system is armed
14	Instant Interior Door	Y	An interior sensor that triggers an alarm **instantly** while armed to both stay and away. Does not trip if an entry/exit sensor is tripped first
16	Away Instant- Follower Delay	Y	Interior door that **triggers alarm instantly** when system is armed to away mode only

DOOR/WINDOW

GROUP	NAME	SUPERVISED	SCENARIO
25	Local Safety Sensor	Y	This sensor does **not** report or trigger an alarm. This is a **chime only** sensor when "Activity Monitoring" is active, regardless of panel status. Used for medicine cabinets, chemical storage etc
8	Reporting Safety Sensor	Y	This sensor reports to the central station and **triggers** an alarm when "Activity Monitoring" is active, regardless of panel status
9	Delayed Reporting Safety Sensor	Y	This sensor reports to the central station and triggers an alarm when "Activity Monitoring" is active, regardless of panel status. This sensor has an entry delay

MOTION/IMAGE SENSOR

GROUP	NAME	SUPERVISED	SCENARIO
17	Away- Instant Motion	Y	Active only when armed to "Away", and trips instantly when motion is detected. Does **not** trip if an entry/exit sensor is tripped first
15	Stay- Instant Motion	Y	Active in both "Stay" & "Away" modes, and trips instantly when motion is detected. Does **not** trip if an entry/exit sensor is tripped first
35	Stay- Delay Motion	Y	Active in both "Stay" & "Away" modes. Triggers an entry delay when motion is detected. Does **not** trip if an entry/exit sensor is tripped first
20	Away- Delay Motion	Y	Active when armed to "Away". Triggers an entry delay when motion is detected. Does **not** trip if an entry/exit sensor is tripped first
25	Safety Motion	Y	This sensor does **not** report or trigger an alarm. This is a chime only sensor when "Activity Monitoring" is active, regardless of panel status. Used for medicine cabinets, storage, activity tracking, etc

GLASS BREAK

GROUP	NAME	SUPERVISED	SCENARIO
13	Glass Break	Y	Active in both "Stay" and "Away" mode
17	Glass Break -Away Only	Y	Active in "Away" mode only

KEY FOB

GROUP	NAME	SUPERVISED	SCENARIO
1	Mobile Intrusion	N	**Worn or carried**, the button(s) is/are programmed to trigger a **police panic**
6	Mobile Auxiliary	N	**Worn** as a wrist watch or pendant, the button(s) is/are programmed to trigger an Auxiliary panic. *UL NOTE: Medical functionality has not been evaluated by UL/cUL*
4	Fixed Auxiliary	Y	Installed in a **fixed location** such as night stand, the button(s) is/are programmed to trigger an Auxiliary panic. *UL NOTE: Medical functionality has not been evaluated by UL/cUL*

KEYPAD

GROUP	NAME	SUPERVISED	SCENARIO
0	Fixed Intrusion	Y	Installed in a **fixed location** such as under a desk, the button(s) is/are programmed to trigger a **police panic.** UL NOTE: Hold-up functionality has not been evaluated by UL/cUL
1	Mobile Intrusion	N	**Keypad can be mobile** and is programmed to trigger a **police panic**
2	Fixed Silent	Y	Installed in a **fixed location** such as under a desk, the button(s) is/are programmed to trigger a **silent police panic**

AUXILIARY PENDANT

GROUP	NAME	SUPERVISED	SCENARIO
6	Mobile Auxiliary	N	Worn as a wrist watch or pendant, the button(s) is/are programmed to trigger an **Auxiliary** panic
1	Mobile Intrusion	N	Worn or carried, the button(s) is/are programmed to trigger a **police panic**
0	Fixed Intrusion	Y	Installed in a **fixed location** such us under a desk, the button(s) is/are programmed to trigger a **police panic**
2	Fixed Silent	Y	Installed in a **fixed location** such us under a desk, the button(s) is/are programmed to trigger a **silent police panic**
4	Fixed Auxiliary	Y	Installed in a **fixed location** such as night stand, the button(s) is/are programmed to trigger an auxiliary panic
25	Safety Auxiliary Pendant	N	Used for local alerts like a nurse call button. Will not report an alarm to the Central Station

SMOKE DETECTOR/HEAT

GROUP	NAME	SUPERVISED	SCENARIO
26	Smoke-Heat	Y	Triggers an alarm when sensor detects smoke/rapid rise in heat

SMOKE-M

GROUP	NAME	SUPERVISED	SCENARIO
26	Smoke-Heat	Y	Triggers an alarm when sensor detects smoke or a rapid rise of heat. Use **ONLY** with Qolsys multi-sensor smoke (QS5110-840)

CO DETECTOR

GROUP	NAME	SUPERVISED	SCENARIO
34	CO	Y	Triggers an alarm when sensor detects Carbon Monoxide

HARDWIRE TRANSLATOR

GROUP	NAME	SUPERVISED	SCENARIO
13	Takeover	Y	Triggers an alarm when sensor is tampered in "Stay" or "Away" mode

WIRELESS TRANSLATOR

GROUP	NAME	SUPERVISED	SCENARIO
13	Translator	Y	Triggers an alarm when sensor is tampered in "Stay" or "Away" mode

Qolsys
QUALITY OF LIFE

WATER

GROUP	NAME	SUPERVISED	SCENARIO
38	Water Sensor	Y	Triggers an alarm when sensor detects presence of water. *UL NOTE: flood sensor functionality has not been evaluated by UL/ cUL*

Please note: When selecting "Water" you will see two additional options under "Sensor Sub-Type"
For IQ TempH2O (QS5500-PO1) & the IQ Flood (QS5516-840) select "Multi-Function-1", for all others, select "Flood-2"

SHOCK SENSOR

GROUP	NAME	SUPERVISED	SCENARIO
13	Shock-Glass-Break	Y	Arms and trips shock sensors immediately when armed to both "Stay" and "Away"
17	Glass-Break-Away Only	Y	Arms and trips shock sensors immediately when armed only to "Away"

Please note: When selecting "Shock" you will see two additional options under "Sensor Sub-Type"
For IQ Shock select "IQ Shock", for all others select "Other Shock"

FREEZE

GROUP	NAME	SUPERVISED	SCENARIO
52	Freeze	Y	Triggers an alarm when sensor detects low temperatures. *UL NOTE: temperature sensor functionality has not been evaluated by UL/cUL*

TILT

GROUP	NAME	SUPERVISED	SCENARIO
10	Entry-Exit- Normal Delay	Y	Triggers alarm after "normal delay" expires. Arms with both "Stay" and "Away"
12	Entry-Exit- Long Delay	Y	Triggers alarm after "long delay" expires. Arms with both "Stay" and "Away
25	Garage Tilt- Safety Tilt	Y	This sensor does **not** report or trigger an alarm. This is a chime only sensor when "Activity Monitoring" is active, regardless of panel status. Great for detached garage/shops.*UL NOTE: Functionality in conjunction with garage door openers has not been evaluated by UL/cUL*

DOOR BELL

GROUP	NAME	SUPERVISED	SCENARIO
25	Local Safety Sensor	Y	This sensor does **not** report or trigger an alarm. This is a chime only sensor when "Activity Monitoring" is active, regardless of panel status. Great to automate lights, cameras and notifications etc

SIREN

GROUP	NAME	SUPERVISED	SCENARIO
33	Siren	Y	Used for supervising Z-Wave sirens for wireless connectivity. Reports to the central station.
25	Local Safety Sensor	Y	Used for supervising Z-Wave sirens for wireless connectivity. Local supervision only. Does **NOT** report to the central station.

DOOR/WINDOW-M (For use only with Multi-function Door/Window Sensors)

GROUP	NAME	SUPERVISED	SCENARIO
10	Entry-Exit- Normal Delay	Y	Gives a period of time to exit the home or to disarm the panel when returning before sounding the alarm
12	Entry-Exit- Long Delay	Y	Gives a period of time to exit the home or to disarm the panel when returning before sounding the alarm. This can be a separate delay from the "normal delay"
13	Instant Perimeter D/W	Y	Door or window that triggers alarm **instantly** when system is armed
14	Instant Interior Door	Y	An interior sensor that triggers an alarm **instantly** while armed to both stay and away. Does not trip if an entry/exit sensor is tripped first
16	Away Instant- Follower Delay	Y	Interior door that **triggers alarm instantly** when system is armed to away mode only

DOOR/WINDOW-M (For use only with Multi-function Door/Window Sensors)

GROUP	NAME	SUPERVISED	SCENARIO
25	Local Safety Sensor	Y	This sensor does **not** report or trigger an alarm. This is a **chime only** sensor when "Activity Monitoring" is active, regardless of panel status. Used for medicine cabinets, chemical storage etc
8	Reporting Safety Sensor	Y	This sensor reports to the central station and **triggers** an alarm when "Activity Monitoring" is active, regardless of panel status
9	Delayed Reporting Safety Sensor	Y	This sensor reports to the central station and triggers an alarm when "Activity Monitoring" is active, regardless of panel status. This sensor has an entry delay

OCCUPANCY SENSOR

GROUP	NAME	SUPERVISED	SCENARIO
25	Occupancy Sensor	Y	This sensor group is to be used for monitoring activity in the home. This group does not report

12:39 PM
01/24/18

NO	DEVICE NAME	IP ADDRESS	STATUS	ACTIONS
1	IQ Remote 1	192.168.1.8	Active	PING

Pair

1. Connect the IQ Remote to the panel's access point or to the same Wi-Fi network the panel is connected to. *Please note: IQ Remote only supports 2.4Ghz networks*

2. Select "Pair" on the panel. Similar to "WPS" this will initiate a discovery process on the panel.

3. Select "GO" or "Pair" on the IQ Remote. This will find the panel on the network and connect to it.

4. The remote device will pair to the panel and will show that it is active on the list. You can then edit (device name and sensor group), ping or delete the device.

Note: The IQ Remote will automatically pair as Sensor Type "Keypad" and will appear on the zone list in the order in which it is paired. Sensor Groups 0, 1 & 2 are available options for this Sensor Type.

Z-WAVE DEVICES

Z-Wave Devices
Add, Edit, Clear and Remove Z-Wave Devices. You can also View/Edit associations as well as access Z-Wave Settings.

Add Device
Pair new devices

Edit Device
Make changes to existing devices

Clear Device
Clears or resets the memory of a Z-Wave device. Also deletes a device from the IQ Panel 2 if currently paired.
(Requires you touch the "Pair" button on the device)

Delete Failed Device
Remove a failed Z-Wave device from the IQ Panel 2's memory
(does not require you to have the device)

Remove All Devices
Delete all Z-Wave devices from the IQ Panel 2's memory

View/Edit Associations
Manually change Z-Wave associations for specific devices.

Z-Wave Settings
Configure device limits and other Z-Wave settings.

Shows actual dBm signal strength of each sensor and graphs sensor events against the ambient noise floor of the environment. Also displays the traditional packet count method. This new version of the Sensor Test requires **RF PIC Version 10.2.15-G1** or higher.

ZONE	NAME	AVERAGE DBM	LAST EVENT RESULTS (DBM) (PACKETS)		
1	Back Window	Strong (-43)	Strong (-47)	Perfect (16)	
2	Front Window	Strong (-31)	Strong (-33)	Perfect (8)	
3	Back Door	Good (-55)	Good (-55)	Excellent (7)	

Refer to page 85 for the sensor packet results table.

The Advanced Sensor Test shows a summary page of each sensor paired to the panel along with the average dBm level , the last event's dBm level and how many packets were received from the sensor.

Select the graph icon to the right of each sensor to view an individual sensor's graphed signal strength in real time.

SENSOR TEST

Note: For UL/cUL , perform a placement test first for all wireless initiating devices. The acceptable result shall be "Excellent".

SENSOR TEST

- The **GREEN** dots represent each state change or supervisory signal transmitted from a sensor to the panel.

— The **YELLOW** line represents a dBm level where signal strength is "Poor" and potential RF failures could occur. This line dynamically adjusts to 12 dBm above the ambient RF noise floor in the environment.

— The **RED** line represents a dBm level where signal strength is "Critical" and RF failures are likely. This line dynamically adjusts to 6 dBm above the ambient RF noise floor in the environment.

TROUBLESHOOTING:
If a sensor falls below the yellow line, try changing it's orientation (vertical/horizontal), move the sensor to a different part of the door/window or adjust the panel's RF pigtail antenna.

Then re-test to see the if the result improved.

Sensor Test
The panel can test its connection and communication to individual security sensors. Before running this test there must be at least one security sensor paired with the system. This version of the sensor test is for panels with the older **RF PIC Version 10.2.15-G0**.

Sensors connected to the panel will appear on the screen. The panel will detect open and close reports. **Please allow 10 secs between tests if tripping the same device more than once.** "Signal Source" relates to a sensor's frequency.

The panel will audibly report and display test results from "No Signal" to "Perfect", including how many packets were received.

Results	Packets Received
Perfect	8
Excellent	6-7
Good	3-5
Minimum	1-2
No Signal	No RF packets received

NO	ID	SIGNAL SOURCE	NAME	RESULT	LAST RUN TIME
1	61B8A0	G	Water	No Signal

UPGRADE SOFTWARE USING WI-FI

FIND IT

Keeping your panel up to date is essential in ensuring it receives the newest features and is free from bugs.

To perform a software update using Wi-Fi follow the steps below:

1- Ensure your panel is connected to Wi-Fi and has an internet connection.

2- From the drop down menu select "Settings" then "Advanced Settings". (Installer/Dealer Code)

3- Touch "Upgrade Software"

4- Touch "Upgrade Using Network" The IQ Panel 2 will check for the latest software update. If your panel is up to date you will see a message confirming that you have the most recent software version.

5- If a software update IS available the panel will automatically begin downloading it.

6- Once the download is complete a pop up message will appear informing you that in order to install the software you must restart the panel. Touch "OK." Your panel will install the update and automatically restart.

SOFTWARE UPDATES VIA SD CARD

FIND IT

1- Insert an SD card into your computer. *(*We recommend a class 4 or higher SDHC card with 4gb – 16gb storage space)*

2- Download the current software from *dealers.qolsys.com* *(requires login)*

3- Once the file is downloaded, right click the file and select "Unzip" or "Open"

4- Drag all files to your SD card. Delete ANY other files, and safely remove the SD card from your computer

5- Slide your SD card into the slot on the upper right side of the IQ Panel 2.

6- From the drop down menu Touch "Settings"

7- "Advanced Settings" and enter a valid Installer code *(default is 1111)*

8- Touch "Upgrade Software"

9- Touch "Upgrade using SD Card"

10- The panel will search the SD Card for the patch and begin downloading it automatically.

11- Once complete touch "OK" to reboot the panel. DO NOT TOUCH THE SCREEN. The process will take about 5 minutes and the LED may turn red, screen may turn off, etc. After the panel reboots the home screen will appear and the LED will turn green. For the next 5 minutes the panel will update the backup partition. Do not power down or use the panel during this time

11- Eject the SD Card: ("Settings" then touch "SD Card" then "Unmount SD Card"
IMPORTANT: Failure to perform these steps in the proper sequence may result in data corruption and/or panel failure.

UPGRADE SOFTWARE
Note: For UL/cUL the automatic software update feature shall not be enabled.

BATTERY REPLACEMENT
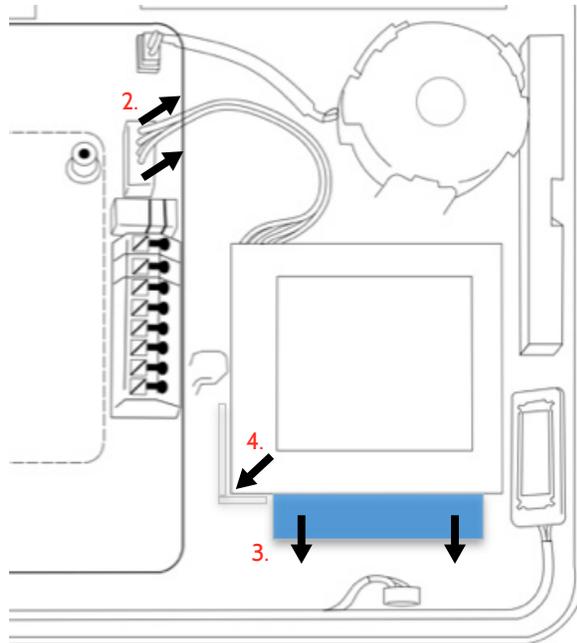

1. **Power down panel:** Go to Advanced Settings and enter the Installer/Dealer/Master code, then select "Power Down"

2. **Unplug Battery Connector:** Once the panel is powered down, unplug 4 pin battery connector from the board.

3. **Remove Battery:** Pull the blue tab from under the battery downwards. This will peel away the tape holding the battery in place.

4. **Install New Battery:** Remove the protective film from the adhesive tape on the back of the battery and seat the battery into the bottom lefthand plastic corner. Plug the battery connector back into the board.

CAUTION:
Do **NOT** use a screwdriver or anything sharp that could puncture the battery.

Do **NOT** pull on the battery cable to try and remove battery.

POWER DOWN

FIND IT

DO NOT remove all power without following the steps below. In the event of needing to move the panel from one location to another it is safe to unplug the power supply while leaving the battery plugged in.

1. From the drop down menu select "Settings".
2. Select "Advanced Settings" then enter your installer code
3. Select "Power Down"
4. Wait for panel LED to turn off
5. Disconnect the power

IMPORTANT: Failure to perform these steps in the proper sequence may result in data corruption and/or panel failure.

PANEL TEST TROUBLESHOOTING

If you run a panel test and it fails, use the following steps to fix the issue.

| Test	Description	If fails:
Arm-Disarm	Tests the arm/disarm operation	Reboot panel, run test again then if necessary perform a master reset and repeat test
Camera	Tests panel camera operation	Reboot panel, run test again then if necessary perform a master reset and repeat test
Photos	Checks that photos are loaded in the photo frame app	1) Go to Settings -> Photo Frame -> Add Photos 2) Add photos from Wifi photo sets or an SD card
Help Videos	Checks help videos are installed in the panel.	1) Go to Settings/Advanced Settings/Installation -> Load Help Videos 2) Load All the Help videos in SD card and insert it into panel 3) Add the selected files from SD card to help videos list on the panel
Battery	Checks panel battery health	1) Make sure the battery is connected 2) If test continues to fail, replace the battery
LED Green/Red	Check panel LED operation	1) Reboot the panel and run the test again 2) Master reset and repeat test

PANEL TEST TROUBLESHOOTING

Test	Description	If fails:
Panel Tamper	Check panel Tamper state	1) Check to ensure backplate is secure and installed properly. 2) Repeat test.
AC Status	Check panel AC power status	1) Inspect the wire leads are secure and properly connected on the terminal block and adapter. 2) Repeat test.
Internet Connection	Check panel's Internet connectivity	1) Go to Wifi Setting page, Enable Wifi and connect to a Wifi Network 2) Make sure Internet is available on the home router. You can check internet information in the "About" section. 3) Contact your network service provider on continued internet connectivity failure.
Wi-Fi	Tests whether panel is connected to Wifi network	1) Go to Wifi Setting page and enable wifi. 2) Connect to a Wifi Network
Upgrade Service	Checks that the panel can receive updates from the Qolsys servers	1) Verify internet and Wi-Fi connections.
Z-Wave	Check panel's Z-Wave module operation	1) Reboot the panel and repeat test. 2) Master reset and repeat test
Sirens	Check that the panel's siren is functioning properly (Burglar, Auxiliary, Fire & CO).	1) Verify the siren is plugged in

CANNOT LOAD HELP VIDEOS

If your panel cannot load a help video you will receive an error message. Please ensure that your video(s) meet the requirements:

Acceptable File types:
.m4v

Total storage space:
200MB

NOTE: videos look best
in aspect ratio
1280x800

IMPORTANT

Important warning and information can be found on the interior and exterior of the panel's mounting plate.

IMPORTANT

This Class [B] digital apparatus meets all requirements of the Canadian Interference–Causing Equipment Regulations.
Cet appareil numérique de la classe [B] respecte toutes les exigences du Réglement sur le matériel brouilleur du Canada.

IMPORTANT! Changes or modifications not expressly approved by Qolsys Inc. could void the user's authority to operate the equipment.

CAUTION! This equipment complies with radiation exposure limits set forth for uncontrolled environment. The antenna(s) used for this transmitters must be installed to provide a separation distance of at least 20 cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter.
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

–Reorient or relocate the receiving antenna.
–Increase the separation between the equipment and receiver.
–Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
–Consult the dealer or an experienced radio/TV technician for help.

SPECIFICATIONS

Items	Parameters	IQ Panel 2
Platform	Android OS	Android 5.1
LCD Display	Size	7'' LCD
	Resolution	1280 x 800
	Brightness	300 cd/m2
	RGB	24bit
Touchscreen	Type	Capacitive glass multi-touch
User Codes	Up to 242	Role based (Dealer, Installer, Master, User, Guest, Duress)
Wireless	WiFi	Wi-Fi 802.11 a/b/g/n/ac dual band 2.4/5ghz - including built-in router capability
	Image Sensor	Supports up to 5 Alarm.com Image Sensors (if included)
	Z-Wave	Supports up to 134 devices (80 lights, 15 Smart Sockets, 6 Locks, 6 Thermostats, 21 Misc, 6 Garage Doors)
	Cellular	LTE (Bands 2,4,5,12,13,17)
	Security R/F	Encrypted 319.5MHz, up to 128 RF zones, with legacy device support
	Bluetooth	Qualcomm Bluetooth Low Energy (BLE) 4.0
Hardwire Input	Wired x2	2 non powered closed loop circuit with 4.7k EOL resistor
Siren Output	Wired x1	1 controlled output (open collector), 300mA max with a 12v power supply wired in series
Flash Memory	Internal Storage	12GB NAND Flash
SD Card Slot	Push-Push	Micro SD slot x 1
LED Indicator	Status LED	Green (Disarmed), Red (Armed)
Speaker	Stereo 1W x 2	Stereo speakers (unified audio)

SPECIFICATIONS

Items	Parameters	IQ Panel 2
Camera	Front Camera	5MP fixed focus
Microphone	Microphone	Stereo microphones x 2
Siren	Piezo	SPL minimum 85dB for UL985
Tamper	Tamper Switch	Reporting tamper release button
Battery	Type	Litium Polymer 3200mAh
Buttons	Standby	Right side button used for sleep/wake, hard reboot, and clean screen cancel
Mechanical	Dimension	5''H x 7.75''W x .75''D (195mm x 130mm x 23mm)
Power Supply	AC/DC	Output: 5v - 5.5v 1000mA DC, Input 100-240VAC 50/60Hz
Mount	Back Plate	Wall mount or table top (stand included)
Certification	UL/cUL	UL-985, UL-1023, UL-1635, UL-639, UL-498A, UL-634, ULC-634, ULC-S306, CSA-C22.2
	FCC	2AAJXQS-IQPANEL2 (may contain additional modules with separate FCC ID's)
	IC	11205A-QSIQPANEL2
	Safety	
Temperature	Operational	-10-50C, Note: not evaluated by UL/cUL
	Storage	-40 - 80C
